

DOCUMENT: Publishers permission request - USC authors

Dear Sir/Madam,

The University of the Sunshine Coast has developed an Institutional Research Repository which is designed to showcase the work of academics at this university (the University of the Sunshine Coast) and to facilitate research collaboration.

The repository is scheduled for launch in June 2007 and we are currently populating the repository in preparation for this. It will be open access with terms and conditions restricting users to use for individual non commercial purposes only.

The records will always include the full reference for the published article, a copyright notice and a link to the journal's web page. This link promotes the journal to other researchers in the same field.

I seek clearance on behalf of all USC authors whose work is published through your company to allow deposit to the USC open access institutional repository of either or both of the following versions of their work;

- 1. The authors final peer reviewed version as accepted for publication AND/OR**
- 2. The published full text version**

I look forward to hearing from you at your earliest convenience.

Regards
Copyright Coordinator, Information Services
University of the Sunshine Coast
